

QUALITY AND ENVIRONMENTAL POLICY

SALICRU Management is aware that the quality of the products manufactured and the service it provides are the primary factor for the development and continuity of its activities, thereby ensuring customer satisfaction , so it is responsible for defining , implementing and keeping a quality and environmental policy to make this goal possible.

SALICRU Management defines and reviews the quality and environmental objectives , the key elements to get them awarded to each process and area, those that apply, the needed responsibility and authority , the human, technical and precise material resources , ensuring the implementation and continuous improvement of the Quality and Environmental System.

The **SALICRU** Quality and Environmental System is structured and adapted to ensure that the products and services offered are in accordance with legal and regulatory requirements meeting the needs and expectations of the customer and environmental requirements.

Quality, Pollution Prevention and respect for the environment, as well as any other commitment acquired in relation to our context, are a common goal of all **SALICRU** staff.

SALICRU is concerned about the environmental impacts of its activities, products and services, committing to the continuous improvement of its environmental management, as well as to minimize and properly manage waste and energy consumption and promote recycling.

The **SALICRU** Management establishes the necessary measures to ensure that its quality and environmental policy is disseminated in all areas of the company, its suppliers and contractors, it is implemented, reviewed and kept updated.

The scope of the **SALICRU** Quality and Environmental System includes: design, manufacture, commercialization and after sales service of power electronic equipment, applied to the **SALICRU** plant located in:

SALICRU , S. A.
